

MUHAMMAD ILHAM ZAKARIA

Pamekasan, Jawa Timur, Indonesia | ilhamzakaria3024@gmail.com | (+62) 81939374447 | [linkedin.com/in/ilhamz/](https://www.linkedin.com/in/ilhamz/)

Informatics Engineering graduate with a strong foundation in software development and artificial intelligence. Experienced in building applications using Laravel, Node.js, Codeigniter, and creating AI projects with Python and FastAPI. Has proven leadership and communication skills from two years of experience as a Laboratory Assistant and a successful one-year leading as Coordinator of the WARGALAB community. Adept at coordinating and managing teamworks.

EDUCATION

Bachelor of Informatics Engineering, Universitas Trunodjoyo Madura (UTM)
(GPA: 3.86/4.00)

2022-2026

- **Relevant Coursework:** Algorithms & Data Structure, Software & AI Engineering, Project Management, Database Systems.

EXPERIENCES

AI Research Team | MBKM UTM

2024-2026

- Developed an Artificial Intelligence program to generate a combination of Batik Nitik patterns using BatikGAN and WGAN-GP and style transfer through 3 different AI models variant

Software Engineer Intership | CV. Purnama Kreatifa

2024-2025

- Created an integrated goods procurement system for the company's ERP website with Codeigniter framework.
- Analyzed the company's running business processes and designed the team work plan.

Head Coordinator of Wargalab | Informatics Engineering UTM

2024-2025

- Led the Wargalab community to successfully organize and run laboratory practice activities.
- Coordinated lab sessions and managed the laboratory administration for the Informatics Engineering Department.

PROJECTS

E-Procurement System

2024

- Developed a web-based e-procurement system to integrate and streamline the company's goods management processes.
- Built the application utilizing the Codeigniter framework, Bonfire, and a PostgreSQL database.

Batik Nitik Generator and Combinator

2025-2026

- Developed an AI program to generate and combine two different Batik Nitik patterns to accelerate batik motif innovation.
- Implemented Deep Learning models using WGAN-GP, BatikGAN and developed the website API using FastAPI.

Pothole Image Detection

2025

- Developed a computer vision program to detect road potholes for mapping and locating road damage efficiently.
- Trained and implemented the image segmentation model using PyTorch and the SegFormer architecture.

D'BHERUNK Cashier System

2026

- Developed a web-based point of sale system for D'BHERUNK cafe with a highly responsive and user-friendly interface.
- Built the full-stack application utilizing React for the frontend, alongside Node.js and Express for the backend.

TECHNICAL SKILL

- **Programming Language:** Python, Javascript, C++, PHP, SQL
- **Framework & Libraries:** Laravel, Codeigniter, Node.js, Express, Next.js, React, FastAPI

AWARDS AND SERTIFICATION

- **Bronze Medal** – National Data Science Competition (PEDAS) APTIKOM, 2025
- **BNSP Competency Certificate: Junior Web Programmer** – National Professional Certification Authority, 2024
- **Merit Award** – INTERVARSITY International Technology Innovation Competition, 2024
- **Bronze Medal** – National Science Olympiad (OSN) in Informatics, Regency Level, 2022
